DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 and 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. To improve the claim language, the following language modifications are required:

- a) In claim 1, steps B and C, delete the word "respective", and replace it with the word "corresponding";
- b) In claim 1, steps B and C, add the phrase "of step A" after the phrase "at least one voxel";
- c) In claim 1, step C, add the phrase "of step B" after the phrase "respective diffusion values";
- d) in claim 1, step C, add the phrase "of step A" after the phrase "average diffusion value".

Similar language corrections are required in claim 16 to clarify that the phrase "at least one voxel", which appears three times in the claim, means the same voxel or different voxels.

Allowable Subject Matter

2. Claims 11-15 are allowed as the prior art of record does not teach or suggests an MRI apparatus, wherein a computer is programmed to determines a metric indicative of diffusion along multiple directions in the at least two adjacent voxels without fitting diffusion-weighted imaging data from the at least two adjacent voxels to a tensor model, in combination with the remaining limitations of the claims.
